

The Green Blue

Making the environment second nature

THIS BOAT'S ENVIRONMENTAL CODE OF CONDUCT

Welcome aboard

This is a 'Green Blue' boat...

- We never throw rubbish overboard and we secure loose items so they stay onboard
- We do not allow any oil or fuel to spill into the water, including when pumping the bilge
- We use onshore toilets where possible and try not to use our sea toilet in low tidal-flushing areas
- We navigate carefully when we see marine animals or are in sensitive areas and keep wash to a minimum
- We choose our anchoring site carefully to minimise impact on the seabed
- We use environmentally friendly products
- We recycle our everyday waste where possible
- We collect and safely dispose of waste from maintenance e.g. antifoul

Please support this Code of Conduct while onboard and help keep our coasts and shores beautiful.
